Detail-Bögen

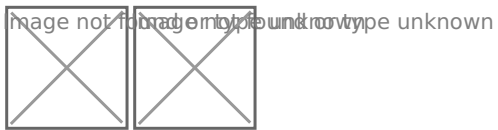

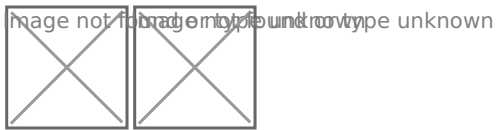

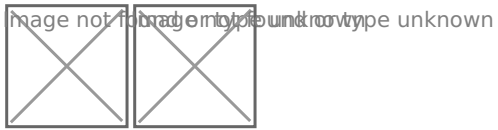

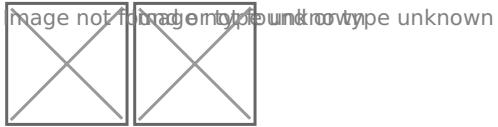

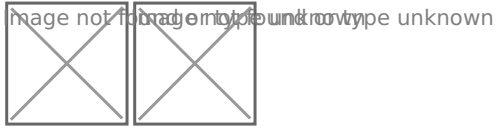

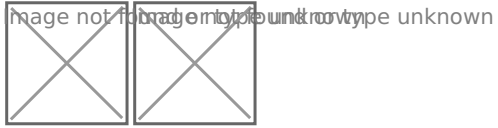

Gussteile

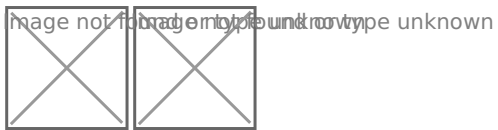

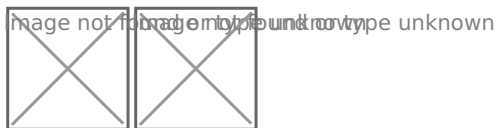

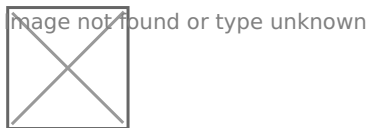

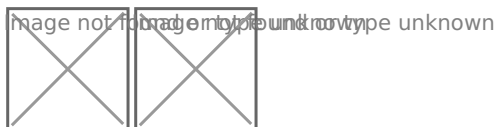

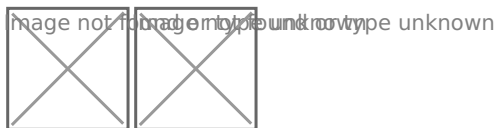

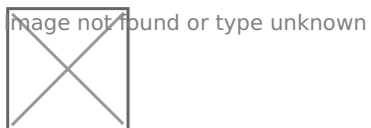

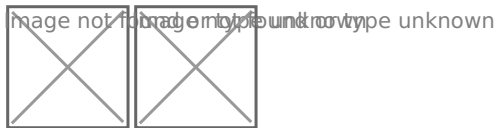

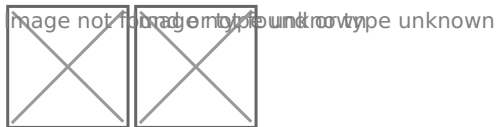

Ich hoffe das ich diese Rundung wegbekomme 😞😞😞

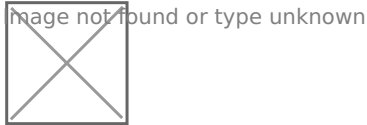

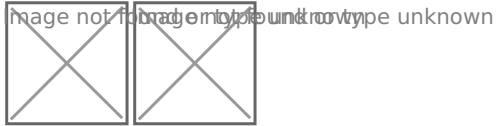

eine kleine Schachtel im Karton

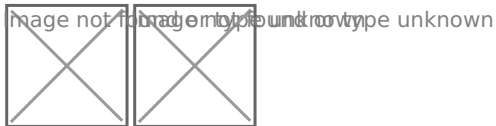

Metallkern für das Fahrgestell

Gummireifen

Fazit: Der Bausatz scheint perfekt und ich freue mich schon loszulegen.

Zum Baubericht: Wird demnächst folgen

<p>Bei den Gummireifen wäre ich vorsichtig was die Verwendung angeht! Bei den alten Italiër 1/35 Militärfahrzeugen waren auch oft Gummireifen dabei gewesen, z.B. beim Opel Blitz und da hat sich dann mit der Zeit der Weichmacher im Gummi verflüchtigt und dann gab es Gummi-Brösel statt Gummireifen am Ende. </p>

no, ich mag die platten reifen nicht 

Beitrag von „albatros32“ vom 11. Dezember 2018, 21:08

Tipp aus dem www zur Verwendung von Gummireifen:
Felgen mit Alufolie oder "Bare Metalfoil" als "Isolierschicht" bekleben, um den Weichmacher fern zu halten!
