Hello to all!

Model - Tamiya Supra 1:24 (24123)

Transkit- 1:24 Toyota Supra (JZA80) Paul Walker Version from ZoomOnModels

Wheels - BBS LM 18" ZoomOnModels

Paul Walker - this name is known to most of the male population of the planet, especially those who are fond of cars.

Like many boys, my acquaintance with this actor happened through the very first Fast & Furious.

As many people know, the actor died on November 30, 2013.

In memory of him, I decided to collect several similar (exactly similar, and not copy, because I have no task to repeat exactly) cars.

The first in the series was the Toyota Supra from the 7th series, the idea to make it came to mind in 2016. Then there was a long stagnation, but after [@zoomonmodel](#) made a good addition, construction was continued and completed in 2020.
